

Workshop Handouts

How to Learn New *Songs* and Find their Rhythm

with ALAN SOUZA

SATURDAY, SEPTEMBER 7TH
1:15, UPPER JENSEN

The Beat

Beats in music can be measured a variety of ways

The beat can be divided into shorter parts.
For this workshop I want you to think about
dividing the beat into 2 parts & 3 parts

1		Beat level
2		Division levels
3		
These all last for 1 beat .		

Each of these have a first beat and we can always just strum on the beat, but this will eventually get boring. We will want to strum some sort of rhythm, but before we can do that, we need to make sure it fits the beat division of the song we are learning.
